### COMMENT

#### Meeting Attended:

I was not able to attend a meeting

#### Important Issues:

Land Use (Agriculture, Residential, Recreation), Health and Safety, Visual / Aesthetic Resources, Proximity to Residences

#### Property Uses:

Agriculture, Residential

#### Comment:

I am sorry I did not attend meetings. I am an out of state land owner and knew nothing of this project until 9-19-09. I do not know how owners were contacted. There are several out of state owners and local owners that did not have information of this until recently.

My wife and I live in Oklahoma and visit our land here in the summer. We have a beautiful view of the mountains.

The proposed route on your simulation page indicates the line may pass across our property or just west of it. We own lot 121 section 66 Colorado land and grazing.

I am very interested in knowing final route so I can plan on further development of my retirement home or stop my plans and work.

The view was the main reason we bought this property. Greenhorn Mountain and Badito Cone to the North, The Wet Mountain valley and Sangre de Cristos to the Northwest and Sheep and Little Sheep Mountains to the west. I feel bad when I picture a large transmission line across that.

The property is on CR530 3.4 miles west of CR520 at the intersection of CR530 and a private road going NE. We are on the N.W. corner. You are welcome to come and enjoy the view.

Sincerely, Doug Fundom

## I-228-001: Visual and Aesthetic (In Review)

Your email/letter/comment form has been received and your comment noted. Potential impacts to visual and aesthetic resources from the proposed project and mitigation measures will be addressed in the Environmental Impact Statement.

The Environmental Impact Statement is anticipated to be completed in late 2010 and will be available at

<http://www.usda.gov/rus/water/ees/ea.htm>.
